## SAP Explicit enhancement points to change standard ABAP code without using a modification

Explicit enhancement points are basically hooks already coded into the program by SAP at various points of the code. See program RIAUFMVK for examples of these! These are very easy to implement simply go into enhancement mode of SE80 and then create or maintain them as you wish. See instruction below for specific steps required for you to be able to change or create an SAP explicit enhancement point.

### Change an explicit enhancement point

First right click on the enhancement point you want change and choose 'Enhancement Implementation->Change'

**SAP Training by Atos**

Awarded No.1 SAP Education Partner. 15K+ Consultants Trained. Apply Now

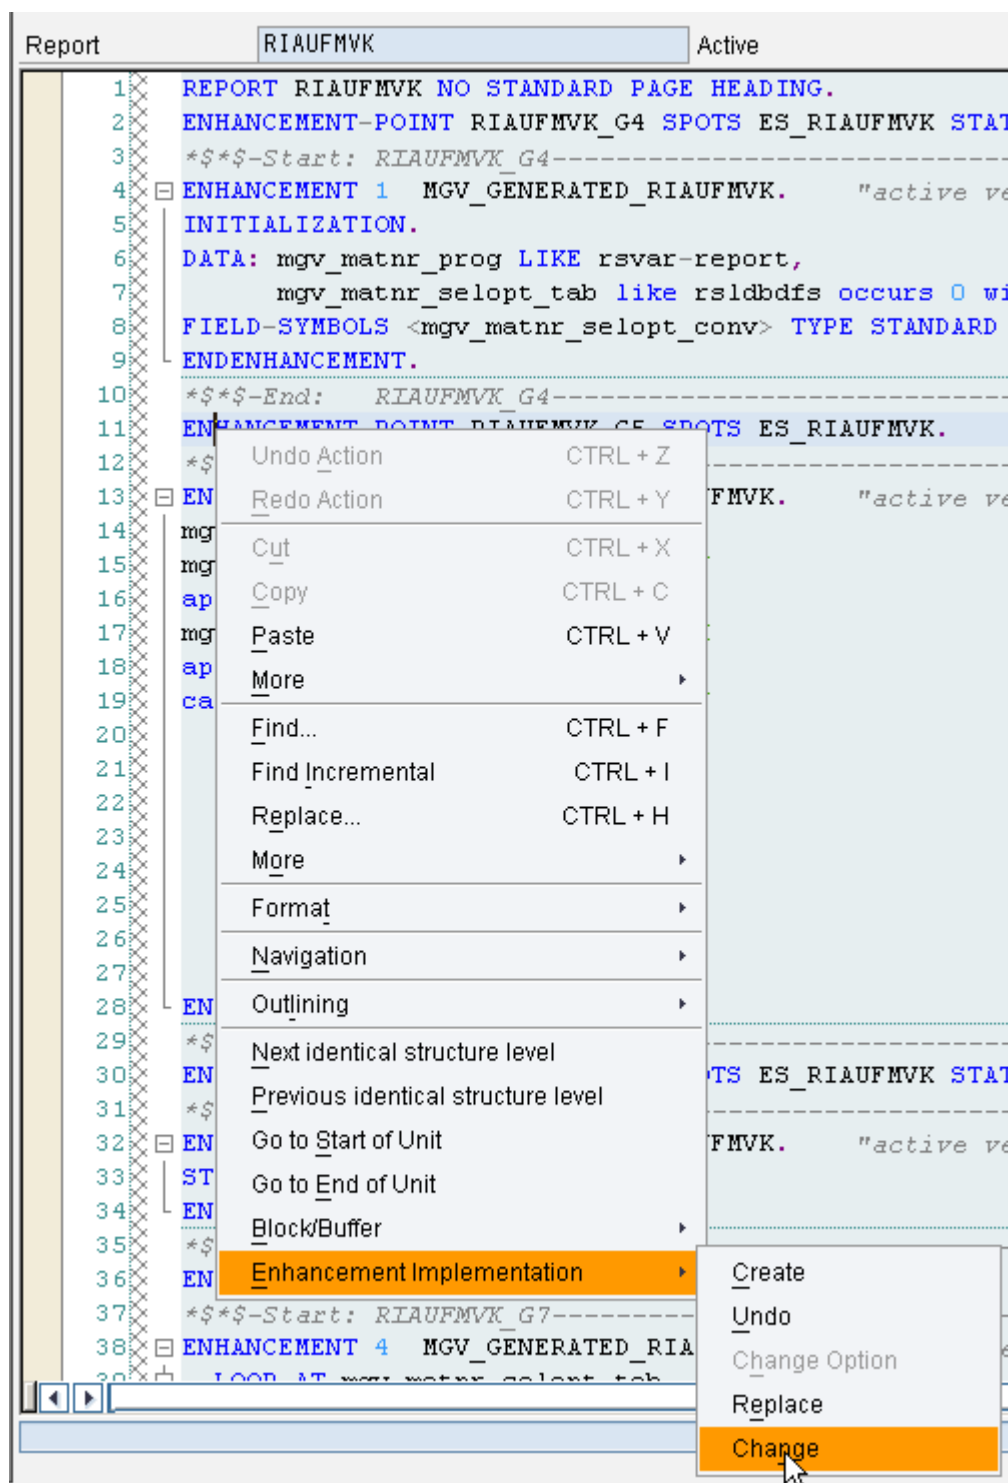

sapeducati

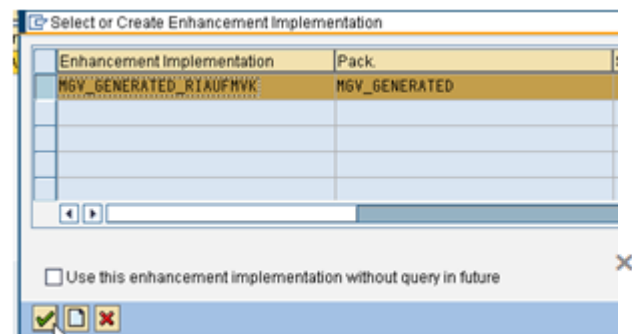

report this ad

Next select the enhancement point and press the green tick

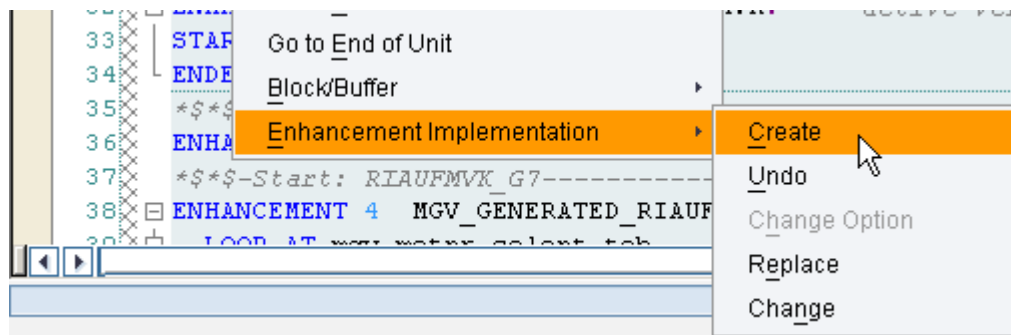

SE80 will now show your enhancement points as editable within the ABAP code so you can change the code as you want.

```
Report      RIAUFMVK      Active
1  REPORT RIAUFMVK NO STANDARD PAGE HEADING.
2  ENHANCEMENT-POINT RIAUFMVK_G4 SPOTS ES_RIAUFMVK STATIC.
3  *$$$-Start: RIAUFMVK_G4-----
4  ENHANCEMENT 1  MGV_GENERATED_RIAUFMVK.      "active version
5  INITIALIZATION.
6  DATA: mgv_matnr_prog LIKE rsvar-report,
7         mgv_matnr_selopt_tab like rsldbdfs occurs 0 with header
8  FIELD-SYMBOLS <mgv_matnr_selopt_conv> TYPE STANDARD TABLE.
9  ENDENHANCEMENT.
10 *$$$-End: RIAUFMVK_G4-----
11 ENHANCEMENT-POINT RIAUFMVK_G5 SPOTS ES_RIAUFMVK.
12 *$$$-Start: RIAUFMVK_G5-----
13 ENHANCEMENT 2  MGV_GENERATED_RIAUFMVK.      "active version
14 mgv_matnr_prog = sy-repid.
15 mgv_matnr_selopt_tab-name = MGV_MATNR_SELOPT_TAB
16 append mgv_matnr_selopt_tab.
17 mgv_matnr_selopt_tab-name = MGV_MATNR_SELOPT_TAB .
18 append mgv_matnr_selopt_tab.
```

### Create an explicit enhancement point

First right click on the enhancement point where you want to add your code and choose 'Enhancement Implementation->Create'

Next click on the create button and Give it a name, description and assign it to a change request (should not be a Z package) and then simply add the code as normal.

Select or Create Enhancement Implementation

| Enhancement Implementation | Pack.         |
|----------------------------|---------------|
| MGV_GENERATED_RIAUFMVK     | MGV_GENERATED |
|                            |               |
|                            |               |
|                            |               |
|                            |               |
|                            |               |

◀ ▶

☐ Use this enhancement implementation without query in

✓ 📄 ✕

Create Enhancement Implementation (F8)

### Enhancement transactions

Once an enhancement has been created you can access it again using the above procedure or via the [SAP enhancements transactions](#) SE20 or SE80

If you can't find one of these enhancements where you need it you could also check out [Implicit Enhancement points](#), which can be implemented in many more locations.
