# How to Implement SAP note in SNOTE

30 63 195,775

Follow

Like

RSS Feed

- Go to Transaction SNOTE
- Read the note carefully and check for validity, Pre-Implementation steps , Post-Implementation steps and Pre-requisite Notes.
- Download / Upload the desired Note <http://scn.sap.com/docs/DOC-43239>
- Do the manual pre-implementation steps in case the Note suggests.
- Implement the pre-requisite Note if needed

- Implement the Note , Navigate to menu Goto -> SAP Note Browser

**Note Assistant: Note Browser**

Note Assistant: Note Browser

Note Assistant: Note Browser

Note	Short text	Component	Proc. Status	Implementation Stat.	User Name
875986	Note Assistant: Important notes for SAP_BASIS up to 702	BC-UPG-NA	In Process	Obsolete version implemented	I058623

Confirm Changes

Following SAP Notes are implemented or deimplemented in this step:

Note Action	Note	Versio...
Deimplement SAP Note	875986	72
Implement SAP Note	1720495	6
Implement SAP Note	875986	103
Implement SAP Note	1720495	6

C	Status	Obj. T...	Object	Message Text
<input checked="" type="checkbox"/>		REPS	SCWB_COUNT_NOTE_VERSION	Changes can be copied
<input checked="" type="checkbox"/>		FUNC	SCWB_CORRECT_SMODILOG_ENTRIES	New object will be created
<input checked="" type="checkbox"/>		FUNC	SCWB_GET_INSTALLED_COMPONENTS	New object will be created
<input checked="" type="checkbox"/>		FUNC	SCWB_GET_SP_LIST_OF_QUEUED_UPG	New object will be created
<input checked="" type="checkbox"/>		FUNC	SCWB_NOTE_READ	Changes can be copied
<input checked="" type="checkbox"/>		REPS	LSCWNTOP	Changes can be copied
<input checked="" type="checkbox"/>		REPS	CWBNTCNS	Changes can be copied

3 weeks ago I read almost the same: [SNOTE Note Implementation](#)

I would appreciate a blog or document that outlines what to do if you hit problems when the note cannot find the context for auto-implementation etc

I have just started documenting the entire process of Note implementation via SNOTE.

Soon I will document the troubleshooting steps of typical problems seen there.

Hi Abhilash,

Thanks for sharing the helpful information.

Could you please share any document regarding this.

Thanks a lot .

Hi,

yes. you need to snote -> download snote

--> give the note number you want to download and continue.

For this, make sure you have the market place connection active.(SAPOSS)

I just given you short info,

Please let me know if you need any help.

Anyways above blog is good.

Like 0 | Share

Nice Blog. Would like to add some more points which might be helpful for implementing the notes.

- How to download SAP note (SAP should be connected to Service market place)

In SNOTE: Click on Download SAP note icon(Ctrl+F8),pop-up will appear, provide the note number you want to download and click Execute(F8). The relevant note will be downloaded.

*One of the way to check if the SAP note can be implemented:*

After downloading the note, in the main page itself under **New** category, you can see the symbol in left against all notes, move the mouse over, you will see a message whether it can be implemented or not. Based on that you can proceed with you implementation.

*Other ways:*

- Check the release version of SAP you are using and verify if the SAP note is for that release version.
- Some of the notes needs to be implemented before implementing the actual note,as a prerequisite(as specified by Abhilash), or sometimes it might need manual corrections or adding new fields to table,structure, append structures to standard tables, etc.
- Some of the notes can be auto-implemented, but some might require manual code changes, other changes like adding new fields to table,structure, append structures to standard tables, etc.

Hence go through the code/corrections which needs to be done and check if it is already there in your SAP system.

- You can also download latest version of SAP notes in SNOTE transaction and implement the relevant in the system if needed.

- The implemented note can be reset if you think, note does not solve your purpose, by going to Note assistant, provide your SAP note number and hit Ctrl+F2 (go to Menu bar->SAP Note->Reset SAP Note Implementation.

Hope it is helpful!

Regards,

M M Jaffer.

Thanks Jaffer for adding those valuable comments 😊 .

Regarding download , I have already created a document . Also mentioned in the above blog.

<http://scn.sap.com/docs/DOC-43239>

I will add the download setup steps to that.

Well recorded,

But would you also add the point on "CHOOSE MAIN PROGRAM" screen

Can you explain more on which PROGRAM to select n how to make a decision on same ?

Regards,

Ravi

Hi All,

SAP note assistant developers created videos on how to implement SAP Notes. You can refer to blog for more information: [Videos on how to implement SAP Notes using SNOTE](#)

**This blog covered videos with topics below:**

- SIM New Version of Note Assistant:

Tutorial objectives - You will be able to understand and work with the new functions in the new version of Note Assistant.

- SIM Note Assistant 1 :

Tutorial objectives - You will be able to load, organize and implement SAP Notes in your system using the Note Assistant.

- SIM Note Assistant 2 :

Tutorial objectives - You will be able to use the Modification Assistant to insert modifications to a program, a header line and a screen.

- SIM Note Assistant 3 :

Tutorial objectives - You will be able to implement SAP Notes with manual interaction and use the split-screen editor in the Note Assistant to adapt corrections.

- SIM Note Assistant 4 :

Tutorial objectives - You will be able to perform Modification adjustment after a Support Package has been imported.

Hope it is helpful!

Best regards,

James Wong

February 3, 2016 at 5:10 am

Dear Sir,

I want to know that can we apply SNOTE directly to PRD server.

or

we have to apply first at DEV server,test and then apply in PRD server.

Is there any SAP document for describing this,If yes...then please share the document.

Please guide me...!!

Regards,

JUNAID AHMAD

And the result would be that your systems are inconsistent, where is here the logic?

**Former Member**

February 3, 2016 at 5:54 am

Hi Junaid,

Best practice is to apply snotes in your development system and transport through your environment to production.
